## Table of Contents

1. Zend_InfoCard .....	1
Introduction .....	1
Basic Theory of Usage .....	1
Using as part of Zend_Auth .....	1
Using the Zend_InfoCard component standalone .....	3
Working with a Claims object .....	3
Attaching Information Cards to existing accounts .....	4
Creating Zend_InfoCard Adapters .....	5
2. Zend_Json .....	7
Introduction .....	7
Basic Usage .....	7
Advanced Usage of Zend_Json .....	7
JSON Objects .....	7
Encoding PHP objects .....	8
Internal Encoder/Decoder .....	8
JSON Expressions .....	8
XML to JSON conversion .....	8
Zend_Json_Server - JSON-RPC server .....	10
Advanced Details .....	12
3. Zend_Layout .....	19
Introduction .....	19
Zend_Layout Quick Start .....	19
Layout scripts .....	19
Using Zend_Layout with the Zend Framework MVC .....	20
Using Zend_Layout as a Standalone Component .....	21
Sample Layout .....	22
Zend_Layout Configuration Options .....	24
Examples .....	24
Zend_Layout Advanced Usage .....	26
Custom View Objects .....	26
Custom Front Controller Plugins .....	26
Custom Action Helpers .....	27
Custom Layout Script Path Resolution: Using the Inflector .....	27
4. Zend_Ldap .....	29
Introduction .....	29
Theory of Operation .....	29
5. Zend_Loader .....	35
Loading Files and Classes Dynamically .....	35
Loading Files .....	35
Loading Classes .....	35
Testing if a File is Readable .....	36
Using the Autoloader .....	36
The Autoloader .....	37
Using the Autoloader .....	37
The Autoloader Interface .....	38
Autoloader Reference .....	39
Resource Autoloaders .....	41
Resource autoloader usage .....	41
The Module Resource Autoloader .....	43
Using Resource Autoloaders as Object Factories .....	43
Resource Autoloader Reference .....	43
Loading Plugins .....	43
Basic Use Case .....	43

Manipulating Plugin Paths .....	45
Testing for Plugins and Retrieving Class Names .....	45
Getting Better Performance for Plugins .....	45
6. Zend_Locale .....	47
Introduction .....	47
What is Localization .....	47
What is a Locale? .....	48
How are Locales Represented? .....	48
Selecting the Right Locale .....	49
Usage of automatic Locales .....	49
Using a default Locale .....	50
ZF Locale-Aware Classes .....	51
Application wide locale .....	52
Zend_Locale_Format::setOptions(array \$options) .....	52
Speed up Zend_Locale and its subclasses .....	53
Using Zend_Locale .....	53
Copying, Cloning, and Serializing Locale Objects .....	53
Equality .....	53
Default locales .....	54
Set a new locale .....	54
Getting the language and region .....	55
Obtaining localized strings .....	55
Obtaining translations for "yes" and "no" .....	67
Get a list of all known locales .....	68
Detecting locales .....	68
Normalization and Localization .....	70
Number normalization: getNumber(\$input, Array \$options) .....	70
Number localization .....	71
Number testing .....	73
Float value normalization .....	73
Floating point value localization .....	74
Floating point value testing .....	74
Integer value normalization .....	74
Integer point value localization .....	74
Integer value testing .....	75
Numeral System Conversion .....	75
Working with Dates and Times .....	77
Normalizing Dates and Times .....	77
Testing Dates .....	81
Normalizing a Time .....	81
Testing Times .....	81
Supported locales .....	82
Migrating from previous versions .....	93
Migrating from 1.6 to 1.7 or newer .....	93
7. Zend_Log .....	95
Overview .....	95
Creating a Log .....	95
Logging Messages .....	95
Destroying a Log .....	96
Using Built-in Priorities .....	96
Adding User-defined Priorities .....	96
Understanding Log Events .....	96
Writers .....	97
Writing to Streams .....	97
Writing to Databases .....	98
Writing to Firebug .....	98
Writing to Email .....	100
Stubbing Out the Writer .....	102

---

Testing with the Mock .....	102
Compositing Writers .....	103
Formatters .....	103
Simple Formatting .....	103
Formatting to XML .....	104
Filters .....	104
Filtering for All Writers .....	104
Filtering for a Writer Instance .....	105
8. Zend_Mail .....	107
Introduction .....	107
Getting started .....	107
Configuring the default sendmail transport .....	107
Sending via SMTP .....	108
Sending Multiple Mails per SMTP Connection .....	108
Using Different Transports .....	109
HTML E-Mail .....	110
Attachments .....	110
Adding Recipients .....	111
Controlling the MIME Boundary .....	111
Additional Headers .....	112
Character Sets .....	112
Encoding .....	112
SMTP Authentication .....	112
Securing SMTP Transport .....	113
Reading Mail Messages .....	113
Simple example using Pop3 .....	114
Opening a local storage .....	114
Opening a remote storage .....	114
Fetching messages and simple methods .....	115
Working with messages .....	116
Checking for flags .....	118
Using folders .....	119
Advanced Use .....	120
9. Zend_Measure .....	125
Introduction .....	125
Creation of Measurements .....	125
Creating measurements from integers and floats .....	125
Creating measurements from strings .....	126
Measurements from localized strings .....	127
Outputting measurements .....	127
Automatic output .....	128
Outputting values .....	128
Output with unit of measurement .....	128
Output as localized string .....	129
Manipulating Measurements .....	129
Convert .....	129
Add and subtract .....	129
Compare .....	130
Compare .....	131
Manually change values .....	131
Manually change types .....	132
Types of measurements .....	132
Hints for Zend_Measure_Binary .....	135
Hints for Zend_Measure_Number .....	135
Roman numbers .....	135
10. Zend_Memory .....	137
Overview .....	137
Introduction .....	137

---

Theory of Operation .....	137
Memory Manager .....	138
Creating a Memory Manager .....	138
Managing Memory Objects .....	139
Memory Manager Settings .....	140
Memory Objects .....	140
Movable .....	140
Locked .....	140
Memory container 'value' property. ....	141
Memory container interface .....	141
11. Zend_Mime .....	145
Zend_Mime .....	145
Introduction .....	145
Static Methods and Constants .....	145
Instantiating Zend_Mime .....	145
Zend_Mime_Message .....	146
Introduction .....	146
Instantiation .....	146
Adding MIME Parts .....	146
Boundary handling .....	146
parsing a string to create a Zend_Mime_Message object (experimental) .....	146
Zend_Mime_Part .....	147
Introduction .....	147
Instantiation .....	147
Methods for rendering the message part to a string .....	147
12. Zend_Navigation .....	149
Introduction .....	149
Pages and Containers .....	149
Separation of data (model) and rendering (view) .....	149
Pages .....	149
Common page features .....	149
Zend_Navigation_Page_Mvc .....	152
Zend_Navigation_Page_Uri .....	155
Creating custom page types .....	155
Creating pages using the page factory .....	157
Containers .....	158
Creating containers .....	158
Adding pages .....	164
Removing pages .....	165
Finding pages .....	166
Iterating containers .....	167
Other operations .....	168
13. Zend_OpenId .....	171
Introduction .....	171
What is OpenID? .....	171
How Does it Work? .....	171
Zend_OpenId Structure .....	172
Supported OpenID Standards .....	172
Zend_OpenId_Consumer Basics .....	172
OpenID Authentication .....	172
Combining all Steps in One Page .....	174
Consumer Realm .....	175
Immediate Check .....	175
Zend_OpenId_Consumer_Storage .....	175
Simple Registration Extension .....	179
Integration with Zend_Auth .....	181
Integration with Zend_Controller .....	182
Zend_OpenId_Provider .....	182

Quick Start .....	182
Combined Provide Scripts .....	185
Simple Registration Extension .....	186
Anything Else? .....	188
14. Zend_Paginator .....	189
Introduction .....	189
Usage .....	189
Paginating data collections .....	189
Rendering pages with view scripts .....	190
Configuration .....	195
Advanced usage .....	195
Custom data source adapters .....	195
Custom scrolling styles .....	196
Caching features .....	196
15. Zend_Pdf .....	199
Introduction .....	199
Creating and Loading PDF Documents .....	199
Save Changes to PDF Documents .....	200
Working with Pages .....	200
Page Creation .....	201
Page cloning. ....	201
Drawing .....	202
Geometry .....	202
Colors .....	202
Shape Drawing .....	203
Text Drawing .....	205
Using fonts .....	205
Standard PDF fonts limitations. ....	208
Extracting fonts. ....	209
Image Drawing .....	210
Line drawing style .....	211
Fill style .....	211
Linear Transformations .....	212
Save/restore graphics state .....	213
Clipping draw area .....	214
Styles .....	215
Transparency .....	217
Document Info and Metadata. ....	217
Zend_Pdf module usage example .....	219
16. Zend_ProgressBar .....	225
Zend_ProgressBar .....	225
Introduction .....	225
Basic Usage of Zend_Progressbar .....	225
Persistent progress .....	225
Standard adapters .....	225
17. Zend_Reflection .....	229
Introduction .....	229
Zend_Reflection Examples .....	229
Zend_Reflection Reference .....	231
Zend_Reflection_Docblock .....	231
Zend_Reflection_Docblock_Tag .....	231
Zend_Reflection_Docblock_Tag_Param .....	232
Zend_Reflection_Docblock_Tag_Return .....	232
Zend_Reflection_File .....	232
Zend_Reflection_Class .....	232
Zend_Reflection_Extension .....	233
Zend_Reflection_Function .....	233
Zend_Reflection_Method .....	233

Zend_Reflection_Parameter .....	233
Zend_Reflection_Property .....	233
18. Zend_Registry .....	235
Using the Registry .....	235
Setting Values in the Registry .....	235
Getting Values from the Registry .....	235
Constructing a Registry Object .....	235
Accessing the Registry as an Array .....	236
Accessing the Registry as an Object .....	236
Querying if an Index Exists .....	237
Extending the Registry .....	238
Unsetting the Static Registry .....	238
19. Zend_Rest .....	239
Introduction .....	239
Zend_Rest_Client .....	239
Introduction .....	239
Responses .....	239
Request Arguments .....	241
Zend_Rest_Server .....	242
Introduction .....	242
REST Server Usage .....	242
Calling a Zend_Rest_Server Service .....	242
Sending A Custom Status .....	242
Returning Custom XML Responses .....	243
20. Zend_Search_Lucene .....	245
Overview .....	245
Introduction .....	245
Document and Field Objects .....	245
Understanding Field Types .....	246
HTML documents .....	247
Word 2007 documents .....	248
Powerpoint 2007 documents .....	249
Excel 2007 documents .....	250
Building Indexes .....	251
Creating a New Index .....	251
Updating Index .....	251
Updating Documents .....	251
Retrieving Index Size .....	252
Index optimization .....	252
Permissions .....	253
Limitations .....	254
Searching an Index .....	254
Building Queries .....	254
Search Results .....	255
Limiting the Result Set .....	256
Results Scoring .....	256
Search Result Sorting .....	257
Search Results Highlighting .....	257
Query Language .....	259
Terms .....	259
Fields .....	260
Wildcards .....	260
Term Modifiers .....	261
Range Searches .....	261
Fuzzy Searches .....	262
Matched terms limitation. ....	262
Proximity Searches .....	262
Boosting a Term .....	262

Boolean Operators .....	263
Grouping .....	264
Field Grouping .....	264
Escaping Special Characters .....	264
Query Construction API .....	265
Query Parser Exceptions .....	265
Term Query .....	265
Multi-Term Query .....	266
Boolean Query .....	267
Wildcard Query .....	268
Fuzzy Query .....	269
Phrase Query .....	269
Range Query .....	272
Character Set .....	272
UTF-8 and single-byte character set support .....	272
Default text analyzer .....	273
UTF-8 compatible text analyzers .....	273
Extensibility .....	274
Text Analysis .....	274
Tokens Filtering .....	276
Scoring Algorithms .....	277
Storage Containers .....	278
Interoperating with Java Lucene .....	280
File Formats .....	280
Index Directory .....	281
Java Source Code .....	281
Advanced .....	281
Starting from 1.6, handling index format transformations. ....	281
Using the index as static property .....	282
Best Practices .....	283
Field names .....	283
Indexing performance .....	284
Index during Shut Down .....	285
Retrieving documents by unique id .....	286
Memory Usage .....	287
Encoding .....	287
Index maintenance .....	288
21. Zend_Server .....	289
Introduction .....	289
Zend_Server_Reflection .....	289
Introduction .....	289
Usage .....	289
22. Zend_Service .....	291
Introduction .....	291
Zend_Service_Akismet .....	291
Introduction .....	291
Verify an API key .....	291
Check for spam .....	292
Submitting known spam .....	293
Submitting false positives (ham) .....	293
Zend-specific Accessor Methods .....	294
Zend_Service_Amazon .....	294
Introduction .....	294
Country Codes .....	295
Looking up a Specific Amazon Item by ASIN .....	295
Performing Amazon Item Searches .....	296
Using the Alternative Query API .....	297
Zend_Service_Amazon Classes .....	297

---

Zend_Service_Amazon_Ec2 .....	302
Introduction .....	302
What is Amazon Ec2? .....	302
Zend_Service_Amazon_Ec2: Instances .....	302
Instance Types .....	302
Running Amazon EC2 Instances .....	304
Amazon Instance Utilities .....	305
Zend_Service_Amazon_Ec2: Amazon Machine Images (AMI) .....	307
AMI Information Utilities .....	307
AMI Attribute Utilities .....	308
Zend_Service_Amazon_Ec2: Elastic Block Storage (EBS) .....	309
Create EBS Volumes and Snapshots .....	310
Describing EBS Volumes and Snapshots .....	311
Attach and Detaching Volumes from Instances .....	311
Deleting EBS Volumes and Snapshots .....	312
Zend_Service_Amazon_Ec2: Elastic IP Addresses .....	313
Zend_Service_Amazon_Ec2: Keypairs .....	314
Zend_Service_Amazon_Ec2: Regions and Availability Zones .....	315
Amazon EC2 Regions .....	315
Amazon EC2 Availability Zones .....	315
Zend_Service_Amazon_Ec2: Security Groups .....	316
Security Group Maintenance .....	316
Authorizing Access .....	317
Revoking Access .....	318
Zend_Service_Amazon_S3 .....	319
Introduction .....	319
Registering with Amazon S3 .....	319
API Documentation .....	319
Features .....	319
Getting Started .....	319
Bucket operations .....	320
Object operations .....	321
Stream wrapper .....	322
Zend_Service_Audioscrobbler .....	323
Introduction .....	323
Users .....	323
Artists .....	325
Tracks .....	326
Tags .....	326
Groups .....	326
Forums .....	326
Zend_Service_Delicious .....	327
Introduction .....	327
Retrieving posts .....	327
Zend_Service_Delicious_PostList .....	328
Editing posts .....	329
Deleting posts .....	329
Adding new posts .....	330
Tags .....	330
Bundles .....	330
Public data .....	331
HTTP client .....	332
Zend_Service_Flickr .....	332
Introduction .....	332
Finding Flickr Users' Photos and Information .....	333
Finding photos From a Group Pool .....	333
Retrieving Flickr Image Details .....	334
Zend_Service_Flickr Result Classes .....	334

Zend_Service_Nirvanix .....	336
Introduction .....	336
Registering with Nirvanix .....	336
API Documentation .....	336
Features .....	336
Getting Started .....	337
Understanding the Proxy .....	337
Examining Results .....	338
Handling Errors .....	339
Zend_Service_ReCaptcha .....	339
Introduction .....	339
Simplest use .....	340
Zend_Service_Simpy .....	340
Introduction .....	340
Links .....	341
Tags .....	342
Notes .....	343
Watchlists .....	344
Introduction .....	344
Getting Started with Zend_Service_SlideShare .....	345
The SlideShow object .....	345
Retrieving a single slide show .....	347
Retrieving Groups of Slide Shows .....	348
Zend_Service_SlideShare Caching policies .....	348
Changing the behavior of the HTTP Client .....	349
Zend_Service_StrikeIron .....	349
Overview .....	349
Registering with StrikeIron .....	350
Getting Started .....	350
Making Your First Query .....	351
Examining Results .....	351
Handling Errors .....	352
Checking Your Subscription .....	353
Zend_Service_StrikeIron: Bundled Services .....	353
ZIP Code Information .....	353
U.S. Address Verification .....	354
Sales & Use Tax Basic .....	355
Zend_Service_StrikeIron: Advanced Uses .....	355
Using Services by WSDL .....	355
Viewing SOAP Transactions .....	356
Zend_Service_Technorati .....	356
Introduction .....	356
Getting Started .....	357
Making Your First Query .....	357
Consuming Results .....	358
Handling Errors .....	359
Checking Your API Key Daily Usage .....	360
Available Technorati Queries .....	360
Zend_Service_Technorati Classes .....	364
Zend_Service_Twitter .....	367
Introduction .....	367
Authentication .....	368
Account Methods .....	368
Status Methods .....	369
User Methods .....	371
Direct Message Methods .....	372
Friendship Methods .....	373
Favorite Methods .....	373

Zend_Service_Twitter_Search .....	374
Zend_Service_Yahoo .....	375
Introduction .....	375
Searching the Web with Yahoo! .....	375
Finding Images with Yahoo! .....	376
Finding videos with Yahoo! .....	376
Finding Local Businesses and Services with Yahoo! .....	377
Searching Yahoo! News .....	377
Searching Yahoo! Site Explorer Inbound Links .....	377
Searching Yahoo! Site Explorer's PageData .....	377
Zend_Service_Yahoo Classes .....	378
23. Zend_Session .....	385
Introduction .....	385
Basic Usage .....	385
Tutorial Examples .....	386
Iterating Over Session Namespaces .....	387
Accessors for Session Namespaces .....	387
Advanced Usage .....	387
Starting a Session .....	388
Locking Session Namespaces .....	389
Namespace Expiration .....	389
Session Encapsulation and Controllers .....	390
Preventing Multiple Instances per Namespace .....	390
Working with Arrays .....	391
Using Sessions with Objects .....	392
Using Sessions with Unit Tests .....	392
Global Session Management .....	393
Configuration Options .....	394
Error: Headers Already Sent .....	396
Session Identifiers .....	396
rememberMe(integer \$seconds) .....	398
forgetMe() .....	398
sessionExists() .....	398
destroy(bool \$remove_cookie = true, bool \$readonly = true) .....	398
stop() .....	399
writeClose(\$readonly = true) .....	399
expireSessionCookie() .....	399
setSaveHandler(Zend_Session_SaveHandler_Interface \$interface) .....	399
namespaceIsset(\$namespace) .....	399
namespaceUnset(\$namespace) .....	399
namespaceGet(\$namespace) .....	400
getIterator() .....	400
Zend_Session_SaveHandler_DbTable .....	400
24. Zend_Soap .....	403
Zend_Soap_Server .....	403
Zend_Soap_Server constructor. ....	403
Methods to define Web Service API. ....	404
Request and response objects handling. ....	405
Zend_Soap_Client .....	406
Zend_Soap_Client Constructor .....	406
Performing SOAP Requests .....	407
WSDL Accessor .....	408
Zend_Soap_Wsdl constructor. ....	408
addMessage() method. ....	409
addPortType() method. ....	409
addPortOperation() method. ....	409
addBinding() method. ....	410
addBindingOperation() method. ....	410

addSoapBinding() method. ....	410
addSoapOperation() method. ....	410
addService() method. ....	411
Type mapping. ....	411
addDocumentation() method. ....	413
Get finalized WSDL document. ....	413
Parsing WSDL documents ....	413
AutoDiscovery ....	414
AutoDiscovery Introduction ....	414
Class autodiscovering ....	415
Functions autodiscovering ....	416
Autodiscovering Datatypes ....	417
WSDL Binding Styles ....	417
25. Zend_Tag ....	419
Introduction ....	419
Zend_Tag_Cloud ....	419
Decorators ....	420
26. Zend_Test ....	423
Introduction ....	423
Zend_Test_PHPUnit ....	423
Bootstrapping your TestCase ....	424
Testing your Controllers and MVC Applications ....	425
Assertions ....	426
Examples ....	429
27. Zend_Text ....	433
Zend_Text_Figlet ....	433
Zend_Text_Table ....	434
28. Zend_TimeSync ....	437
Introduction ....	437
Why Zend_TimeSync ? ....	437
What is NTP ? ....	437
What is SNTP? ....	438
Problematic usage ....	438
Decide which server to use ....	438
Working with Zend_TimeSync ....	438
Generic Time Server Request ....	438
Multiple Time Servers ....	439
Protocols of Time Servers ....	439
Using Ports for Time Servers ....	440
Time Servers Options ....	440
Using Different Time Servers ....	440
Information from Time Servers ....	441
Handling Exceptions ....	441
29. Zend_Tool_Framework ....	443
Introduction ....	443
Using the CLI Tool ....	443
Setting up the CLI tool ....	444
Setting up the CLI tool on Unix-like Systems ....	444
Setting up the CLI tool on Windows ....	445
Other Setup Considerations ....	446
Where To Go Next? ....	447
Architecture ....	447
Registry ....	447
Providers ....	448
Loaders ....	449
Manifests ....	449
Clients ....	451
Creating Providers to use with Zend_Tool_Framework ....	452

---

Basic Instructions for Creating Providers .....	452
Advanced Development Information .....	453
Shipped System Providers .....	453
The Version Provider .....	454
The Manifest Provider .....	454
30. Zend_Tool_Project .....	455
Zend_Tool_Project Introduction .....	455
Create A Project .....	455
Zend Tool Project Providers .....	456
31. Zend_Translate .....	457
Introduction .....	457
Starting multi-lingual .....	457
Adapters for Zend_Translate .....	458
How to decide which translation adapter to use .....	458
Integrate self written Adapters .....	460
Speedup all Adapters .....	461
Using Translation Adapters .....	461
Translation Source Structures .....	463
Creating Array source files .....	464
Creating Gettext source files .....	465
Creating TMX source files .....	465
Creating CSV source files .....	466
Creating INI source files .....	467
Options for adapters .....	467
Handling languages .....	469
Automatic source detection .....	471
Checking for translations .....	474
How to log not found translations .....	475
Accessing source data .....	476
Migrating from previous versions .....	477
Migrating from 1.6 to 1.7 or newer .....	477
32. Zend_Uri .....	479
Zend_Uri .....	479
Overview .....	479
Creating a New URI .....	479
Manipulating an Existing URI .....	479
URI Validation .....	480
Common Instance Methods .....	480
33. Zend_Validate .....	483
Introduction .....	483
What is a validator? .....	483
Basic usage of validators .....	483
Customizing messages .....	484
Using the static is() method .....	485
Translating messages .....	485
Standard Validation Classes .....	486
Alnum .....	486
Alpha .....	486
Barcode .....	486
Between .....	486
Ccnum .....	486
Date .....	486
Db_RecordExists and Db_NoRecordExists .....	487
Digits .....	488
EmailAddress .....	488
Float .....	490
GreaterThan .....	490
Hex .....	490

Hostname .....	490
Iban .....	492
InArray .....	493
Int .....	493
Ip .....	493
LessThan .....	493
NotEmpty .....	493
Regex .....	493
Sitemap Validators .....	493
StringLength .....	494
Validator Chains .....	494
Writing Validators .....	495
Validation Messages .....	499
34. Zend_Version .....	507
Getting the Zend Framework Version .....	507
35. Zend_View .....	509
Introduction .....	509
Controller Script .....	509
View Script .....	509
Options .....	510
Short Tags with View Scripts .....	510
Utility Accessors .....	511
Controller Scripts .....	511
Assigning Variables .....	512
Rendering a View Script .....	512
View Script Paths .....	513
View Scripts .....	513
Escaping Output .....	514
Using Alternate Template Systems .....	515
View Helpers .....	520
Initial Helpers .....	520
Helper Paths .....	567
Writing Custom Helpers .....	567
Zend_View_Abstract .....	569
Migrating from Previous Versions .....	569
Migrating from versions prior to 1.7.5 .....	569
36. Zend_Wildfire .....	571
Zend_Wildfire .....	571
37. Zend_XmlRpc .....	573
Introduction .....	573
Zend_XmlRpc_Client .....	573
Introduction .....	573
Method Calls .....	573
Types and Conversions .....	574
Server Proxy Object .....	575
Error Handling .....	576
Server Introspection .....	577
From Request to Response .....	577
HTTP Client and Testing .....	578
Zend_XmlRpc_Server .....	578
Introduction .....	578
Basic Usage .....	578
Server Structure .....	579
Conventions .....	579
Utilizing Namespaces .....	580
Custom Request Objects .....	580
Custom Responses .....	580
Handling Exceptions via Faults .....	580

Caching Server Definitions Between Requests .....	581
Usage Examples .....	581
A. Zend Framework Requirements .....	585
Introduction .....	585
PHP Version .....	585
PHP Extensions .....	585
Zend Framework Components .....	589
Zend Framework Dependencies .....	592
B. Zend Framework Coding Standard for PHP .....	617
Overview .....	617
Scope .....	617
Goals .....	617
PHP File Formatting .....	617
General .....	617
Indentation .....	617
Maximum Line Length .....	617
Line Termination .....	617
Naming Conventions .....	618
Classes .....	618
Filenames .....	618
Functions and Methods .....	618
Variables .....	619
Constants .....	619
Coding Style .....	620
PHP Code Demarcation .....	620
Strings .....	620
Arrays .....	621
Classes .....	621
Functions and Methods .....	622
Control Statements .....	624
Inline Documentation .....	625
C. Zend Framework Performance Guide .....	627
Introduction .....	627
Class Loading .....	627
How can I optimize my <code>include_path</code> ? .....	627
How can I eliminate unnecessary <code>require_once</code> statements? .....	629
How can I speed up plugin loading? .....	629
Zend_Db Performance .....	630
How can I reduce overhead introduced by <code>Zend_Db_Table</code> for retrieving table metadata? .....	630
SQL generated with <code>Zend_Db_Select</code> s not hitting my indexes; how can I make it better? .....	631
Internationalization (i18n) and Localization (l10n) .....	631
Which translation adapter should I use? .....	631
How can I make translation and localization even faster? .....	632
View Rendering .....	632
How can I speed up resolution of view helpers? .....	632
How can I speed up view partials? .....	633
How can I speed up calls to the <code>action()</code> view helper? .....	634
D. Copyright Information .....	637
Index .....	639

## List of Tables

4.1. Zend_Ldap Options .....	30
4.2. accountCanonicalForm .....	31
5.1. Zend_Loader_Autoloader Methods .....	39
6.1. Details for getTranslationList(\$type = null, \$locale = null, \$value = null) .....	55
6.2. Details for getTranslation(\$value = null, \$type = null, \$locale = null) .....	61
6.3. Differences between ZF 1.0 and ZF 1.5 .....	66
6.4. Format tokens for self generated number formats .....	72
6.5. List of supported numeral systems .....	76
6.6. Key values for getDate() with option 'fix_date' .....	77
6.7. Return values .....	78
6.8. Format definition .....	80
6.9. Example formats .....	80
6.10. List of all supported languages .....	82
7.1. Firebug Logging Styles .....	100
8.1. Mail Read Feature Overview .....	114
8.2. Mail Folder Names .....	119
9.1. List of measurement types .....	132
12.1. Common page options .....	150
12.2. MVC page options .....	152
12.3. URI page options .....	155
14.1. Adapters for Zend_Paginator .....	189
14.2. Scrolling styles for Zend_Paginator .....	191
14.3. Properties available to view partials .....	194
14.4. Configuration methods for Zend_Paginator .....	195
20.1. Zend_Search_Lucene_Field Types .....	247
22.1. Zend_Service_Amazon_Item Properties .....	298
22.2. Zend_Service_Amazon_Image Properties .....	299
22.3. Zend_Service_Amazon_OfferSet Properties .....	299
22.4. Properties .....	300
22.5. Zend_Service_Amazon_SimilarProduct Properties .....	301
22.6. Zend_Service_Amazon_Accessories Properties .....	301
22.7. Zend_Service_Amazon_CustomerReview Properties .....	301
22.8. Zend_Service_Amazon_EditorialReview Properties .....	302
22.9. Zend_Service_Amazon_Listmania Properties .....	302
22.10. Available Instance Types .....	303
22.11. Valid Run Options .....	304
22.12. Launch permissions fall into three categories .....	308
22.13. Valid Attributes .....	308
22.14. Methods for retrieving public data .....	331
22.15. Methods of the Zend_Service_Delicious_SimplePost class .....	332
22.16. Zend_Service_Flickr_ResultSet Properties .....	334
22.17. Zend_Service_Flickr_Result Properties .....	335
22.18. Zend_Service_Flickr_Image Properties .....	336
22.19. Zend_Service_Yahoo_ResultSet .....	379
22.20. Zend_Service_Yahoo_LocalResultSet Properties .....	379
22.21. Zend_Service_Yahoo_Result Properties .....	380
22.22. Zend_Service_Yahoo_WebResult Properties .....	381
22.23. Zend_Service_Yahoo_ImageResult Properties .....	381
22.24. Zend_Service_Yahoo_VideoResult Properties .....	382
22.25. Zend_Service_Yahoo_LocalResult Properties .....	382
22.26. Zend_Service_Yahoo_NewsResult Properties .....	383
22.27. Zend_Service_Yahoo_Image Properties .....	383
30.1. Project Provider Options .....	455

30.2. Project Provider Options .....	456
31.1. Adapters for Zend_Translate .....	458
31.2. Options for translation adapters .....	468
33.1. Available Validation Messages .....	499
35.1. Sitemap XML elements .....	559
37.1. PHP and XML-RPC Type Conversions .....	574
37.2. Zend_XmlRpc_Value Objects for XML-RPC Types .....	575
A.1. PHP Extensions Used in Zend Framework by Component .....	585
A.2. Zend Framework Components and the PHP Extensions they use .....	589
A.3. Zend Framework Components and their dependency to other ZF Components .....	593

---

## List of Examples

2.1. Zend_Json_Server Usage .....	10
3.1. Passing options to the constructor or startMvc() .....	25
3.2. Using setOption() and setConfig() .....	25
3.3. Using Accessors .....	25
3.4. Using Zend_Layout accessors to modify the inflector .....	27
3.5. Direct modification of Zend_Layout inflector .....	27
3.6. Custom inflectors .....	28
5.1. Example of the loadFile() Method .....	35
5.2. Example of the loadClass() Method .....	35
5.3. Example of isReadable() method .....	36
5.4. Example of registering the autoloader callback method .....	36
5.5. Example of registering the autoload callback method from an extended class .....	37
5.6. Using the PluginLoader class file include cache .....	46
6.1. Choosing a specific locale .....	48
6.2. Automatically selecting a locale .....	49
6.3. Using automatic locales .....	50
6.4. Handling locale exceptions .....	50
6.5. Setting a default locale .....	51
6.6. Dates default to correct locale of web users .....	51
6.7. Overriding default locale selection .....	51
6.8. Performance optimization when using a default locale .....	51
6.9. Usage of an application wide locale .....	52
6.10. Dates default to correct locale of web users .....	52
6.11. Using STANDARD definitions for setOptions() .....	52
6.12. clone .....	53
6.13. Check for equal locales .....	53
6.14. Get default locales .....	54
6.15. setLocale .....	54
6.16. getLanguage and getRegion .....	55
6.17. getTranslationList .....	55
6.18. getTranslationList .....	66
6.19. Converting country name in one language to another .....	67
6.20. All Languages written in their native language .....	67
6.21. getQuestion() .....	68
6.22. getLocaleList() .....	68
6.23. Simple locale detection .....	68
6.24. Strict locale detection .....	69
6.25. Implement locale aware behaviour .....	69
6.26. Locale aware behaviour as with ZF 1.8 .....	70
6.27. Number normalization .....	70
6.28. Number normalization with precision .....	71
6.29. Number localization .....	72
6.30. Number localization with precision .....	72
6.31. Using a self defined number format .....	73
6.32. Number testing .....	73
6.33. Floating point value normalization .....	73
6.34. Floating point value localization .....	74
6.35. Floating point value testing .....	74
6.36. Integer value normalization .....	74
6.37. Integer value localization .....	74
6.38. Integer value testing .....	75
6.39. Converting numerals from Eastern Arabic scripts to European/Latin scripts .....	75
6.40. Converting numerals from Latin script to Eastern Arabic script .....	76

6.41. Getting 4 letter CLDR script code using a native-language name of the script .....	76
6.42. Normalizing a date .....	78
6.43. Normalizing a date by locale .....	79
6.44. Normalizing a date with time .....	79
6.45. Normalizing a userdefined date .....	79
6.46. Automatic correction of input dates .....	80
6.47. Date testing .....	81
6.48. Normalize an unknown time .....	81
6.49. Testing a time .....	82
6.50. How to change isLocale() from 1.6 to 1.7 .....	93
6.51. How to change getDefault() from 1.6 to 1.7 .....	94
7.1. Logging with Zend_Controller_Front .....	99
7.2. Logging without Zend_Controller_Front .....	99
8.1. Simple E-Mail with Zend_Mail .....	107
8.2. Passing additional parameters to the Zend_Mail_Transport_Sendmail transport .....	108
8.3. Sending E-Mail via SMTP .....	108
8.4. Sending Multiple Mails per SMTP Connection .....	108
8.5. Manually controlling the transport connection .....	109
8.6. Using Different Transports .....	110
8.7. Sending HTML E-Mail .....	110
8.8. E-Mail Messages with Attachments .....	110
8.9. Changing the MIME Boundary .....	112
8.10. Adding E-Mail Message Headers .....	112
8.11. Enabling authentication within Zend_Mail_Transport_Smtp .....	113
8.12. Enabling a secure connection within Zend_Mail_Transport_Smtp .....	113
9.1. Converting measurements .....	125
9.2. The meter measurement .....	125
9.3. Creation using integer and floating values .....	126
9.4. Creation using strings .....	126
9.5. Arbitrary text input containing measurements .....	126
9.6. Localized string .....	127
9.7. Automatic output .....	128
9.8. Output a value .....	128
9.9. Outputting units .....	128
9.10. Convert .....	129
9.11. Adding units .....	130
9.12. Subtract .....	130
9.13. Different measurements .....	130
9.14. Identical measurements .....	131
9.15. Difference .....	131
9.16. Changing a value .....	131
9.17. Changing the type .....	132
10.1. Using Zend_Memory component .....	137
12.1. Custom page properties .....	152
12.2. getHref() generates the page URI .....	153
12.3. isActive() determines if page is active .....	153
12.4. Using routes .....	154
12.5. The most simple custom page .....	156
12.6. A custom page with properties .....	156
12.7. Creating an MVC page using the page factory .....	157
12.8. Creating a URI page using the page factory .....	157
12.9. Creating a custom page type using the page factory .....	158
12.10. Creating a container using an array .....	159
12.11. Creating a container using a config object .....	161
12.12. Adding pages to a container .....	164
12.13. Removing pages from a container .....	165
12.14. Finding pages in a container .....	166
12.15. Iterating a container .....	167

12.16. Converting a container to an array .....	168
13.1. The Simple OpenID Login form .....	173
13.2. The Authentication Request Handler .....	173
13.3. The Authentication Response Verifier .....	174
13.4. The Complete OpenID Login Script .....	174
13.5. Authentication Request for Specified Realm .....	175
13.6. Immediate Check without Interaction .....	175
13.7. Database Storage .....	176
13.8. Sending Requests with a Simple Registration Extension .....	180
13.9. Verifying Responses with a Simple Registration Extension .....	180
13.10. Zend_Auth Adapter for OpenID .....	181
13.11. The Identity .....	183
13.12. Simple Identity Provider .....	183
13.13. Simple Login Screen .....	184
13.14. Simple Trust Screen .....	185
13.15. Everything Together .....	186
13.16. Identity with Profile .....	186
13.17. Provider with SREG .....	187
15.1. Create new or load existing PDF document. ....	199
15.2. Requesting Specific Revisions of a PDF Document .....	200
15.3. Saving PDF Documents .....	200
15.4. PDF document pages management. ....	201
15.5. Cloning existing page. ....	201
15.6. Draw a string on the page .....	205
15.7. Draw a UTF-8-encoded string on the page .....	205
15.8. Create a standard font .....	206
15.9. Create a TrueType font .....	207
15.10. Create a TrueType font, but do not embed it in the PDF document. ....	207
15.11. Do not throw an exception for fonts that cannot be embedded. ....	207
15.12. Do not compress an embedded font. ....	208
15.13. Combining font embedding options. ....	208
15.14. Combining font embedding options. ....	208
15.15. Extracting fonts from a loaded document. ....	209
15.16. Extracting font from a loaded document by specifying font name. ....	209
15.17. Image drawing .....	211
15.18. Zend_Pdf module usage demo .....	219
16.1. Basic example for the client-side stuff .....	227
17.1. Performing reflection on a file .....	229
17.2. Performing reflection on a class .....	230
17.3. Performing reflection on a method .....	230
17.4. Performing reflection on a docblock .....	230
18.1. Example of set() Method Usage .....	235
18.2. Example of get() Method Usage .....	235
18.3. Example of Iterating over the Registry .....	235
18.4. Example of Constructing a Registry .....	236
18.5. Example of Initializing the Singleton Registry .....	236
18.6. Example of Array Access .....	236
18.7. Example of Object Access .....	237
18.8. Example of isRegistered() Method Usage .....	237
18.9. Example of isset() Method Usage .....	237
18.10. Example of Specifying the Singleton Registry's Class Name .....	238
18.11. Example of _unsetInstance() Method Usage .....	238
19.1. A basic REST request .....	239
19.2. Response Status .....	240
19.3. Using Technorati's Rest Service .....	240
19.4. Example Technorati Response .....	240
19.5. Setting Request Arguments .....	241
19.6. Basic Zend_Rest_Server Usage - Classes .....	242

19.7. Basic Zend_Rest_Server Usage - Functions .....	242
19.8. Returning Custom Status .....	243
19.9. Return Custom XML .....	243
20.1. Custom text Analyzer. ....	275
22.1. isSpam() Usage .....	292
22.2. submitSpam() Usage .....	293
22.3. submitHam() Usage .....	293
22.4. Search Amazon Using the Traditional API .....	295
22.5. Search Amazon Using the Query API .....	295
22.6. Choosing an Amazon Web Service Country .....	295
22.7. Looking up a Specific Amazon Item by ASIN .....	295
22.8. Performing Amazon Item Searches .....	296
22.9. Using the ResponseGroup Option .....	296
22.10. Search Amazon Using the Alternative Query API .....	297
22.11. Starting New Ec2 Instances .....	304
22.12. Rebooting an Ec2 Instances .....	305
22.13. Terminating an Ec2 Instances .....	305
22.14. Describing Instances .....	305
22.15. Describing Instances By Image Id .....	306
22.16. Retrieving Console Output .....	306
22.17. Confirm Product Code on an Instance .....	306
22.18. Register an AMI with EC2 .....	307
22.19. Deregister an AMI with EC2 .....	307
22.20. Describe an AMI .....	307
22.21. Modify Image Attributes .....	308
22.22. Reset an AMI Attribute .....	309
22.23. Describe AMI Attribute .....	309
22.24. Create a new EBS Volume .....	310
22.25. Create an EBS Volume from a Snapshot .....	310
22.26. Create a Snapshot of an EBS Volume .....	310
22.27. Describing an EBS Volume .....	311
22.28. Describe Attached Volumes .....	311
22.29. Describe an EBS Volume Snapshot .....	311
22.30. Attaching an EBS Volume .....	311
22.31. Detaching an EBS Volume .....	312
22.32. Deleting an EBS Volume .....	312
22.33. Deleting an EBS Volume Snapshot .....	312
22.34. Allocating a new Elastic IP .....	313
22.35. Describing Allocated Elastic IP Addresses .....	313
22.36. Releasing Elastic IP .....	313
22.37. Associates an Elastic IP to an Instance .....	314
22.38. Disassociate an Elastic IP from an instance .....	314
22.39. Creating a new Amazon Keypair .....	314
22.40. Deleting an Amazon Keypair .....	314
22.41. Describe an Amazon Keypair .....	315
22.42. Viewing the available regions .....	315
22.43. Viewing the available zones .....	316
22.44. Create a new Security Group .....	316
22.45. Describe a Security Group .....	316
22.46. Delete a Security Group .....	317
22.47. Authorizing by IP .....	317
22.48. Authorize By Group .....	317
22.49. Revoke by IP .....	318
22.50. Revoke By Group .....	318
22.51. Zend_Service_Amazon_S3 Usage Example .....	319
22.52. Zend_Service_Amazon_S3 Bucket Removal Example .....	320
22.53. Zend_Service_Amazon_S3 Bucket Listing Example .....	320
22.54. Zend_Service_Amazon_S3 Public Object Example .....	321

22.55. Zend_Service_Amazon_S3 Object Listing Example .....	322
22.56. Zend_Service_Amazon_S3 Streams Example .....	323
22.57. Retrieving User Profile Information .....	324
22.58. Retrieving a User's Weekly Artist Chart .....	324
22.59. Retrieving Related Artists .....	325
22.60. Get all posts .....	327
22.61. Accessing post lists .....	328
22.62. Filtering a Post List with Specific Tags .....	328
22.63. Filtering a Post List by URL .....	329
22.64. Post editing .....	329
22.65. Method call chaining .....	329
22.66. Deleting posts .....	330
22.67. Adding a post .....	330
22.68. Tags .....	330
22.69. Bundles .....	331
22.70. Retrieving public data .....	331
22.71. Changing the HTTP client of Zend_Rest_Client .....	332
22.72. Configuring your HTTP client to keep connections alive .....	332
22.73. Simple Flickr Photo Search .....	333
22.74. Finding a Flickr User's Public Photos by E-Mail Address .....	333
22.75. Retrieving a Group's Pool Photos by Group ID .....	333
22.76. Retrieving Flickr Image Details .....	334
22.77. Querying Links .....	341
22.78. Modifying Links .....	342
22.79. Working With Tags .....	342
22.80. Working With Notes .....	343
22.81. Retrieving Watchlists .....	344
22.82. Sending your first query .....	357
22.83. Refining your query .....	357
22.84. Sending multiple queries with the same Zend_Service_Technorati instance .....	358
22.85. Consuming a result set object .....	358
22.86. Seeking a specific result set object .....	358
22.87. Consuming a standalone result object .....	359
22.88. Handling a Query Exception .....	359
22.89. Getting API key daily usage information .....	360
22.90. Cosmos Query .....	360
22.91. Search Query .....	361
22.92. Tag Query .....	361
22.93. DailyCounts Query .....	362
22.94. TopTags Query .....	362
22.95. BlogInfo Query .....	363
22.96. BlogPostTags Query .....	363
22.97. GetInfo Query .....	363
22.98. Iterating result objects from a resultset collection .....	365
22.99. Creating the Twitter Class .....	368
22.100. Verifying credentials .....	368
22.101. Sessions ending .....	368
22.102. Rating limit status .....	368
22.103. Retrieving public timeline .....	369
22.104. Retrieving friends timeline .....	369
22.105. Retrieving user timeline .....	369
22.106. Showing user status .....	370
22.107. Updating user status .....	370
22.108. Showing user replies .....	370
22.109. Deleting user status .....	371
22.110. Retrieving user friends .....	371
22.111. Retrieving user followers .....	371
22.112. Showing user informations .....	371

22.113. Retrieving recent direct messages received .....	372
22.114. Retrieving recent direct messages sent .....	372
22.115. Sending direct message .....	372
22.116. Deleting direct message .....	372
22.117. Creating friend .....	373
22.118. Deleting friend .....	373
22.119. Checking friend existence .....	373
22.120. Retrieving favorites .....	373
22.121. Creating favorites .....	374
22.122. Deleting favorites .....	374
22.123. JSON Search Example .....	375
22.124. ATOM Search Example .....	375
22.125. Searching the Web with Yahoo! .....	376
22.126. Finding Images with Yahoo! .....	376
22.127. Finding videos with Yahoo! .....	376
22.128. Finding Local Businesses and Services with Yahoo! .....	377
22.129. Searching Yahoo! News .....	377
22.130. Searching Yahoo! Site Explorer Inbound Links .....	377
22.131. Searching Yahoo! Site Explorer's PageData .....	378
23.1. Counting Page Views .....	386
23.2. New Way: Namespaces Avoid Collisions .....	386
23.3. Old Way: PHP Session Access .....	387
23.4. Session Iteration .....	387
23.5. Accessing Session Data .....	387
23.6. Starting the Global Session .....	388
23.7. Locking Session Namespaces .....	389
23.8. Expiration Examples .....	389
23.9. Namespaced Sessions for Controllers with Automatic Expiration .....	390
23.10. Limiting Session Namespace Access to a Single Instance .....	390
23.11. Modifying Array Data with a Session Namespace .....	391
23.12. Building Arrays Prior to Session Storage .....	391
23.13. Workaround: Reassign a Modified Array .....	392
23.14. Workaround: store array containing reference .....	392
23.15. PHPUnit Testing Code Dependent on Zend_Session .....	393
23.16. Using Zend_Config to Configure Zend_Session .....	394
23.17. Session Fixation .....	398
23.18. Basic Setup .....	400
23.19. Using a Multi-Column Primary Key .....	401
25.1. Using Zend_Tag .....	419
25.2. Using Zend_Tag_Cloud .....	420
26.1. Application Login TestCase example .....	423
26.2. Testing a UserController .....	429
27.1. Using Zend_Text_Figlet .....	434
27.2. Using Zend_Text_Table .....	435
31.1. Example of single-language PHP code .....	461
31.2. Example of multi-lingual PHP code .....	462
31.3. Example TMX file .....	466
31.4. Example CSV file .....	466
31.5. Second CSV file example .....	467
31.6. Example INI file .....	467
31.7. Using translation options .....	468
31.8. Handling languages with adapters .....	470
31.9. Automatically language detection .....	470
31.10. Scanning a directory structure for sources .....	472
31.11. Directory scanning for languages .....	472
31.12. Filename scanning for languages .....	473
31.13. Checking if a text is translatable .....	475
31.14. Log translations .....	475

31.15. Self defined log messages .....	476
31.16. Handling languages with adapters .....	476
31.17. Setting languages without getting notices .....	477
32.1. Creating a New URI with Zend_Uri::factory() .....	479
32.2. Manipulating an Existing URI with Zend_Uri::factory() .....	479
32.3. URI Validation with Zend_Uri::check() .....	480
32.4. Allowing special characters in URIs .....	480
32.5. Getting the Scheme from a Zend_Uri_* Object .....	481
32.6. Getting the Entire URI from a Zend_Uri_* Object .....	481
32.7. Validating a Zend_Uri_* Object .....	481
33.1. Sitemap Lastmod Validator .....	494
33.2. Sitemap Priority Validator .....	494
33.3. Creating a Simple Validation Class .....	496
33.4. Writing a Validation Class having Dependent Conditions .....	496
33.5. Validation with Independent Conditions, Multiple Reasons for Failure .....	498
34.1. Example of the compareVersion() Method .....	507
35.1. Basic Usage of Action View Helper .....	523
35.2. Cycle Helper Basic Usage .....	524
35.3. Working with two or more cycles .....	524
35.4. Basic Usage of Partials .....	525
35.5. Using PartialLoop to Render Iterable Models .....	526
35.6. Rendering Partials in Other Modules .....	527
35.7. Basic Usage of Placeholders .....	527
35.8. Using Placeholders to Aggregate Content .....	527
35.9. Using Placeholders to Capture Content .....	528
35.10. Doctype Helper Basic Usage .....	530
35.11. Retrieving the Doctype .....	530
35.12. HeadLink Helper Basic Usage .....	531
35.13. HeadMeta Helper Basic Usage .....	532
35.14. Headscript With Conditional Comments .....	533
35.15. HeadScript Helper Basic Usage .....	534
35.16. Capturing Scripts Using the HeadScript Helper .....	534
35.17. Headstyle With Conditional Comments .....	536
35.18. HeadStyle Helper Basic Usage .....	536
35.19. Capturing Style Declarations Using the HeadStyle Helper .....	536
35.20. HeadTitle Helper Basic Usage .....	537
35.21. Flash helper .....	538
35.22. Customizing the object by passing additional arguments .....	538
35.23. Proxying calls to the navigation container .....	541
35.24. Rendering breadcrumbs .....	546
35.25. Specifying indentation .....	546
35.26. Customize breadcrumbs output .....	546
35.27. Rendering breadcrumbs using a partial view script .....	547
35.28. Specify relations in pages .....	550
35.29. Default rendering of links .....	550
35.30. Specify which relations to render .....	551
35.31. Rendering a menu .....	552
35.32. Calling renderMenu() directly .....	554
35.33. Rendering the deepest active menu .....	554
35.34. Rendering a menu with maximum depth .....	555
35.35. Rendering a menu with minimum depth .....	555
35.36. Rendering only the active branch of a menu .....	557
35.37. Rendering only the active branch of a menu with minimum depth .....	557
35.38. Rendering only the active branch of a menu with maximum depth .....	558
35.39. Rendering only the active branch of a menu with maximum depth and no parents .....	558
35.40. Rendering a custom menu using a partial view script .....	558
35.41. Rendering an XML sitemap .....	560
35.42. Registered instance .....	564

35.43. Within the view .....	565
35.44. Direct usage .....	565
35.45. Single parameter .....	565
35.46. List of parameters .....	566
35.47. Array of parameters .....	566
35.48. Change locale dynamically .....	566
35.49. Change locale statically .....	566
35.50. Get the currently set locale .....	566
37.1. XML-RPC Method Call .....	573
37.2. XML-RPC Method Call with Parameters .....	573
37.3. Proxy the Default Namespace .....	576
37.4. Proxy Any Namespace .....	576
37.5. Handling HTTP Errors .....	576
37.6. Handling XML-RPC Faults .....	577
37.7. Processing Request to Response .....	578
C.1. Example: Optimized include_path .....	628
